

WA Schools Gazetteer

A listing of schools, with locations and dates, in Western Australia

Oaklands 1912

Baldivis 2013

Geoffrey Higham
Geoproject Solutions Pty Ltd
gjh@geoproject.com.au

This listing is a report from a database which is progressively updated. The report reflects only that information added to the database up to the date of printing, which is shown at bottom of each page.

Notes

*This listing is a report from a database which is progressively updated. The report reflects only that information added to the database up to the date of printing, which is shown at bottom of each page.
Grid co-ordinates in metres East and North (MGA zone 50) are shown under the position for places in the Perth region, for use with street directories.*

Scope:

This list includes ALL schools in my database, EXCLUDING those known to serve (or to have served) only pre-school children, but INCLUDING those for which I have incomplete information. In some cases, I have no information other than a name - such entries generally come from "Western Australian Schools 1830-1980" report prepared by Education Department in 1980s and the task of correlating this to other information is ongoing (perhaps for ever...).

School name changes:

It is intended to make a new entry whenever a school's name is changed, however no attempt has been made to research all changes which have been applied to large numbers of schools at one time by government decision. For example, most schools for younger students were changed from "ABC SCHOOL" to "ABC STATE SCHOOL" in the 1940s and then to "ABC PRIMARY SCHOOL" about 1960. Such bulk changes would add considerably to the size of reports without commensurate benefit to the research I perform.

Affiliation:

The column headed Affiliation shows these meanings:

STATE = a government school

STATE-IPS = government school but given "Independent public school " status by WA Education Department (only applies since 2009)

CATHOLIC = affiliated to, or run by, the Roman Catholic church

INDEPENDENT = all other non-government schools (I am gradually collecting detailed affiliations in database but not sufficient to list them yet)

Positions followed by "approx" in the latitude and longitude columns are approximate only.

Sources:

*This information has been gathered from a very wide range of sources. If you are researching a particular school and would like to discuss sources of data, please email me.
Here are some of the most commonly-used sources for my data:*

Site visits by myself and others.

Notes on positions:

Latitude and Longitude are relative to GDA94 datum, however these will be within approx 1 metre of WGS84 values often used by small GPS units such as hand-held, in-vehicle, and smart phones.

East North are in metres on GDA94 datum, Map Grid of Australia zone 50. These are given for Perth metropolitan locations to facilitate comparison with street directories.
